

# Upgrade Your Cable Certification Game and **Get 40% Off\***

Get more out of your Versiv investment by upgrading to the Versiv 2 Main and Remote Bundle.

Versiv 2 supports all the modules, accessories, and software you're using with your current mainframes, while speeding the test experience and lowering cost of ownership.

- Versiv 2 offers built-in wireless — no more unplugging the Wi-Fi adapter to inspect a fiber
- Increased memory
- Faster processor for:
  - Faster test times
  - Faster results transfer to your PC
  - Faster software update times
- Test longer with a new battery.
- Say goodbye to the dirty fingerprints, scratches, and dents from years of hard use.

Upgrading is a snap — just plug your existing DSX™, CertiFiber™ Pro or OptiFiber™ Pro modules into your new Versiv mainframes and you're up and running. No software upgrades or reconfiguring required.

To take advantage this offer, order the models below:
