### General description

FLIR Thermal Studio is a powerful, flexible, and efficient Windows desktop software for creating thermal inspection reports and automation of editing tasks with large amounts of thermal images. The software supports images and videos in standard FLIR format from all modern FLIR thermography cameras, including the C-, T-, E- and GF-series, as well as FLIR One and the P6-series. With the Si-series plug-in you can also import, edit, and create reports from FLIR Si-series Acoustic cameras.

FLIR Thermal Studio is available in over 20 languages as a stand-alone application, Microsoft Office is not required

### Key features and specification

The FLIR Thermal Studio desktop suite includes three versions – Starter, Standard, and Pro – as well as plug-ins like the Route Creator plug-in and the Si-series plug-in.

For more detailed specifications of the different versions of FLIR Thermal Studio, please visit:
